

Project on Science, Technology, and Environment in Muslim Societies

PUBLIC EVENT “FAITH AND CLIMATE CHANGE”

EHSAN MASOOD

Science writer, journalist, broadcaster, and the Bureau Chief for editorials at the journal Nature

FARHANA MAYER

Research Affiliate at Laudato Si Research Institute

CHANTAL ELKIN

Head of the Beliefs and Values at World Wildlife Fund for Nature

KAMRAN SHEHZAD

Director, Islamic Foundation for Ecology and Environmental Sciences

The Oxford Centre for Islamic Studies (OCIS), UK and the Pardee Center for the Longer-Range Future at Boston University, USA are collaborating in a future-oriented, interdisciplinary, and structured research initiative to explore the moral dimensions of climate action and the possible role of faith-based values in encouraging positive environmental and climate behaviors – particularly in the context of Islam and Muslim societies.

As part of the Roundtable on 27-28 May 2024, a Public Event is being organized. It would be a lively, conversational, informed and spontaneous discussion amongst four domain experts that brings a flavour of the Roundtable to a public audience. It will also offer an opportunity to the audience to pose questions and will hopefully excite them about this important area.

27 MAY 2024, 5PM TO 6.15PM
JERUSALEM ROOM, OXFORD CENTRE OF ISLAMIC STUDIES
